1. Summary Scores

Metric	Score / Grade	Status
Website Health	71/100	Fair
Advanced SEO Score	75/100 (Grade B)	Fair
Accessibility Score	85/100 (Grade A)	Good
Performance Score	80/100 (Grade A)	Good
Functional Score	68/100 (Grade B)	Fair
Security Score	80/100 (Grade A)	Good
Content Score	85/100 (Grade A)	Good
UX Score	85/100 (Grade A)	Good
CRO Score	100/100 (Grade A)	Good
Technical Score	75/100 (Grade B)	Fair

2. Functional Testing Summary

Modules Executed	19 / 20	Passed	13
Failed	6	Partial / Skipped	1 / 0

Covers: navigation & link testing, forms & validation, authentication testing, responsive testing, browser compatibility, broken resource testing, console error detection and API validation.

Test Module	Result	Notes / Details
Website Opens	PASS	
Navigation Links	FAIL	6 Broken Links
Navbar	PASS	

Test Module	Result	Notes / Details
Footer	FAIL	2 Broken Footer Links.
Buttons	FAIL	11 Button(s) Failed.
Form Validation	PASS	
Images	FAIL	4 Hidden Images
Content Validation	PASS	
Module	FAIL	1 Encoding Issues Found
Authentication Testing	PASS	
Session & Cookies	PASS	
Accessibility (WCAG)	PASS	
SEO	PASS	
Responsive Design	PASS	
Security Headers	PARTIAL	
Console Error Detection	PASS	
Broken Resources	PASS	
Error Page (404) Handling	FAIL	1 of 3 error-page check(s) failed.
API Validation	PASS	
Browser Compatibility	PASS

Error Page (404) Handling — Failing Items (1 item)

- The error page does not offer an obvious link back to the homepage.

3. Security & Infrastructure Audit

Security Audit

Parameter	Result
Status	CRITICAL_RISK
Total Checks	52
Passed	42
Failed	10
Critical	1

Parameter	Result
High	1
Medium	2
Low	6

Covers: SSL/TLS audit, SSL certificate validation, TLS cipher analysis, security headers, cookie security, CORS, HTTP/HTTPS audit, HTTP methods, sensitive paths, mixed content, cache-control and information disclosure.

SSL / TLS & Certificate Audit

Parameter	Result
TLS Version	TLSv1.3
Cipher Suite	TLS_AES_256_GCM_SHA384
Hostname Verification	PASS
Self-Signed	NO
Valid From	Jul 18 05:50:00 2026 GMT
Valid Until	Oct 16 06:49:58 2026 GMT
Days Remaining	45
Issuer	countryName=US, organizationName=Google Trust Services, commonName=WE1
Subject	commonName=growlity.com
Subject Alt. Names (SAN)	growlity.com, *.growlity.com

DNS, DNSSEC & Domain Audit

Parameter	Result
A Records	104.21.65.81, 172.67.189.104
AAAA Records	2606:4700:3035::6815:4151, 2606:4700:3031::ac43:bd68
MX Records	20 mx2.zoho.com., 50 mx3.zoho.com., 10 mx.zoho.com.
NS Records	colette.ns.cloudflare.com., kolton.ns.cloudflare.com.
CAA Records	None (finding)
DNSSEC Enabled	YES
WHOIS Registrar	GoDaddy.com, LLC
Domain Expiration	2028-05-26 08:15:37+00:00
Days To Expiry	633

Security Issues & Recommendations

Severity	Check	Details	Recommendation
CRITICAL	Website Availability	Website returned HTTP 403.	Verify website availability and server configuration.
HIGH	HTTP to HTTPS Redirect	HTTP does not correctly redirect to HTTPS.	Configure a permanent HTTP to HTTPS redirect.

Severity	Check	Details	Recommendation
MEDIUM	X-Frame-Options	X-Frame-Options header is missing.	Configure a proper X-Frame-Options header.
MEDIUM	DNS - CAA Record	No CAA record found - any public CA can issue certs for this domain.	Add a CAA record restricting which Certificate Authorities may issue certificates.
LOW	Information Disclosure - server	Server technology information exposed: cloudflare	Remove unnecessary technology/version information from HTTP headers.
LOW	Security.txt (RFC 9116)	No security.txt file found.	Publish a /.well-known/security.txt file (RFC 9116) for responsible disclosure contacts.
LOW	Cross-Origin-Opener-Policy	Cross-Origin-Opener-Policy header is missing.	Configure a Cross-Origin-Opener-Policy header to reduce cross-origin attack surface.
LOW	Cross-Origin-Resource-Policy	Cross-Origin-Resource-Policy header is missing.	Configure a Cross-Origin-Resource-Policy header to reduce cross-origin attack surface.
LOW	Cross-Origin-Embedder-Policy	Cross-Origin-Embedder-Policy header is missing.	Configure a Cross-Origin-Embedder-Policy header to reduce cross-origin attack surface.
LOW	X-Permitted-Cross-Domain-Policies	X-Permitted-Cross-Domain-Policies header is missing.	Configure a X-Permitted-Cross-Domain-Policies header to reduce cross-origin attack surface.

Successful Security Checks

Check	Severity	Details
TLS Version	INFO	Secure TLS version detected: TLSv1.3
SSL Certificate	INFO	Valid TLS certificate was successfully retrieved.
TLS Cipher	INFO	Negotiated cipher: TLS_AES_256_GCM_SHA384
Certificate Hostname Match	INFO	Certificate hostname matches the requested domain (SAN/CN verified).
Legacy Protocol Support - TLSv1.0	INFO	Server correctly rejects TLSv1.0.
Legacy Protocol Support - TLSv1.1	INFO	Server correctly rejects TLSv1.1.
Protocol Support - TLSv1.2	INFO	Server supports TLSv1.2.
Protocol Support - TLSv1.3	INFO	Server supports TLSv1.3.
HSTS	INFO	Header present: max-age=31536000; includeSubDomains; preload
Content Security Policy	INFO	Header present: frame-ancestors 'self' https://growlity.com
X-Content-Type-Options	INFO	Header present: nosniff
Referrer Policy	INFO	Header present: same-origin, strict-origin-when-cross-origin
Permissions Policy	INFO	Header present: camera=(self), microphone=(self), geolocation=(self), payment=(self), usb=(), interest-cohort=()
CSP Strength	INFO	CSP does not use unsafe-inline, unsafe-eval, or an obvious wildcard source.
HSTS Strength	INFO	HSTS configured with sufficient max-age, includeSubDomains and preload.
Clickjacking Protection	INFO	Framing is restricted via X-Frame-Options and/or CSP frame-ancestors.
CORS Configuration	INFO	No permissive CORS wildcard detected.
Cookie Security	INFO	No cookies were set during the initial response.
HTTP Methods	INFO	No explicit Allow header exposing methods.
Sensitive Path Exposure	INFO	No tested sensitive paths returned HTTP 200.

Check	Severity	Details
Sensitive / Internal Link Exposure	INFO	No internal, staging or admin/config links were found in the page's outbound links.
Mixed Content	INFO	No obvious HTTP resource references detected.
Cache-Control	INFO	Cache-Control: private, max-age=0, no-store, no-cache, must-revalidate, post-check=0, pre-check=0
Subresource Integrity (SRI)	INFO	No external scripts missing SRI (or none detected).
Robots.txt	INFO	No robots.txt found (nothing to disclose).
HTTP Protocol Version	INFO	Negotiated protocol (via requests/urllib3): HTTP/1.1. Server advertises Alt-Svc: h3=":443"; ma=86400 (h3/h2 support).
DNS - Name Servers	INFO	NS records: colette.ns.cloudflare.com., kolton.ns.cloudflare.com.
DNS - SPF Record	INFO	SPF record found in TXT records.
DNSSEC	INFO	DNSSEC is enabled for this domain.
Domain Expiry (WHOIS)	INFO	Domain registered until 2028-05-26 08:15:37+00:00 (633 days remaining).
Certificate Transparency Logs	INFO	Could not retrieve CT log data (crt.sh unavailable or rate-limited).
Version Disclosure	INFO	No specific software version numbers were disclosed in response headers.
HTTP TRACE Method	INFO	Server does not permit TRACE requests (HTTP 405).
Directory Listing	INFO	No directory listing detected on commonly probed paths.
Open Redirect	INFO	No open redirect behavior detected on commonly probed parameters.
Password Field Autocomplete	INFO	No password input fields detected on this page.
Exposed Secrets in Page Source	INFO	No obvious credential/key patterns detected in page source.
Cryptomining / Known Malicious Script Source	INFO	No script tags referencing known malicious/cryptomining domains were found.
Obfuscated Script / Hidden Iframe Patterns	INFO	No obfuscated script or hidden-iframe patterns detected in page source.
Unsolicited Cross-Domain Redirect	INFO	No meta-refresh redirect detected.
Self Signed Certificate	INFO	Certificate is not self-signed.
Certificate Expiry	INFO	Certificate has 45 days remaining.

Cookie Security

No cookies were observed during this scan - the initial response did not include any **Set-Cookie** headers, so there is nothing to assess here.

4. SEO & Keyword Audit

Metric	Value
Title Tag	BRSR Principles Explained: Complete Guide for Businesses Growlity
Meta Description Present	True
Canonical Tag Present	True
Mobile Friendly	True
H1 Count	1
Structured Data Present	True
Sitemap.xml Found	False
Robots.txt Found	False

Covers: on-page SEO fundamentals, metadata, structured data, crawlability and the keywords the page's own content is actually targeting.

Top Keywords Used

- **brsr** (92x) — Title: Yes | Meta Description: Yes | H1: Yes
- **principles** (62x) — Title: Yes | Meta Description: Yes | H1: Yes
- **sustainability** (54x) — Title: No | Meta Description: Yes | H1: No
- **reporting** (31x) — Title: No | Meta Description: No | H1: No
- **companies** (29x) — Title: No | Meta Description: Yes | H1: No
- **businesses** (27x)
- **governance** (25x)
- **principle** (20x)
- **india** (18x)
- **disclosures** (18x)

5. Content Audit

Metric	Value
Word Count	2860
Headings	41

Metric	Value
Readability	0 (Difficult to read)
Duplicate Paragraphs	0

Covers: thin/duplicate content, content quality & relevance, grammar & readability, and content opportunities.

- Content readability is difficult for average readers.

6. User Experience (UX) Audit

Metric	Value
Navigation Present	True
Footer Present	True
Clear CTA Found	True
Mobile Horizontal Overflow	False
Mobile Nav Visible	False

Covers: navigation & menu structure, mobile responsiveness, readability, accessibility, CTAs and overall usability.

- Navigation menu is not visible/accessible on mobile viewport.

7. Conversion Rate Optimization (CRO) Audit

Metric	Value
CTA Above the Fold	True
Forms Found	0 (Poorly Labeled: 0)
Looks Like E-commerce	False
Analytics Detected	google_analytics

Covers: landing page effectiveness, form usability, checkout process, CTA placement and analytics/conversion tracking.

8. Technical Audit

Metric	Value
Internal Links Checked	16
Broken Links	0
Redirected Links	3
Cache-Control Set	True
Compressed	False
Largest Contentful Paint	1032 ms
Cumulative Layout Shift	0

Covers: HTTPS implementation, redirects, structured data, canonical tags, crawlability, caching/compression and Core Web Vitals.

- 3 internal link(s) go through a redirect.
- Response is not compressed (gzip/brotli).

9. AI Root Cause + Fix Recommendation

[Medium] Navigation Links

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] Footer

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] Buttons

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] Images

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] Functional Module

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] Error Page (404) Handling

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] 1 button(s) missing visible text.

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] 1 input field(s) missing labels.

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Low] Page load time is too high.

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Critical] Website Availability

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Verify website availability and server configuration.

[Medium] X-Frame-Options

Root cause: Neither X-Frame-Options nor a CSP frame-ancestors directive is set, so the page can be embedded in a third-party iframe.

Fix: Configure a proper X-Frame-Options header.

[Low] Information Disclosure - server

Root cause: The Server (or equivalent) response header exposes the underlying platform/technology, which helps an attacker fingerprint the stack.

Fix: Remove unnecessary technology/version information from HTTP headers.

[High] HTTP to HTTPS Redirect

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Configure a permanent HTTP to HTTPS redirect.

[Low] Security.txt (RFC 9116)

Root cause: No /.well-known/security.txt file has been published, so there is no documented channel for responsible vulnerability disclosure.

Fix: Publish a /.well-known/security.txt file (RFC 9116) for responsible disclosure contacts.

[Medium] DNS - CAA Record

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Add a CAA record restricting which Certificate Authorities may issue certificates.

[Low] Cross-Origin-Opener-Policy

Root cause: No Cross-Origin-Opener-Policy header is set, so the page's browsing context can still share a process/window reference with cross-origin popups.

Fix: Configure a Cross-Origin-Opener-Policy header to reduce cross-origin attack surface.

[Low] Cross-Origin-Resource-Policy

Root cause: No Cross-Origin-Resource-Policy header is set, so responses can be loaded cross-origin by default.

Fix: Configure a Cross-Origin-Resource-Policy header to reduce cross-origin attack surface.

[Low] Cross-Origin-Embedder-Policy

Root cause: No Cross-Origin-Embedder-Policy header is set, which is required alongside COOP for full cross-origin isolation.

Fix: Configure a Cross-Origin-Embedder-Policy header to reduce cross-origin attack surface.

[Low] X-Permitted-Cross-Domain-Policies

Root cause: No X-Permitted-Cross-Domain-Policies header is set, leaving the legacy Flash/PDF cross-domain policy surface at its (permissive) default.

Fix: Configure a X-Permitted-Cross-Domain-Policies header to reduce cross-origin attack surface.

[Low] Content readability is difficult for average readers.

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Low] Navigation menu is not visible/accessible on mobile viewport.

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] 3 internal link(s) go through a redirect.

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

[Medium] Response is not compressed (gzip/brotli).

Root cause: See the finding detail above for the specific condition that triggered this check.

Fix: Review the finding detail and apply the relevant web security / QA best practice for this check.

10. Remediation Priority

#	Severity	Finding	Recommended Action
1	Critical	Website Availability	Immediate - block release
2	High	HTTP to HTTPS Redirect	Fix before next release
3	Medium	Navigation Links	Fix in upcoming sprint
4	Medium	Footer	Fix in upcoming sprint
5	Medium	Buttons	Fix in upcoming sprint
6	Medium	Images	Fix in upcoming sprint
7	Medium	Functional Module	Fix in upcoming sprint
8	Medium	Error Page (404) Handling	Fix in upcoming sprint
9	Medium	1 button(s) missing visible text.	Fix in upcoming sprint
10	Medium	1 input field(s) missing labels.	Fix in upcoming sprint
11	Medium	X-Frame-Options	Fix in upcoming sprint
12	Medium	DNS - CAA Record	Fix in upcoming sprint
13	Medium	3 internal link(s) go through a redirect.	Fix in upcoming sprint
14	Medium	Response is not compressed (gzip/brotli).	Fix in upcoming sprint
15	Low	Page load time is too high.	Backlog / best-effort
16	Low	Information Disclosure - server	Backlog / best-effort
17	Low	Security.txt (RFC 9116)	Backlog / best-effort
18	Low	Cross-Origin-Opener-Policy	Backlog / best-effort
19	Low	Cross-Origin-Resource-Policy	Backlog / best-effort
20	Low	Cross-Origin-Embedder-Policy	Backlog / best-effort
21	Low	X-Permitted-Cross-Domain-Policies	Backlog / best-effort
22	Low	Content readability is difficult for average readers.	Backlog / best-effort
23	Low	Navigation menu is not visible/accessible on mobile viewport.	Backlog / best-effort
